

CHARACTER-BASED, GRAPHICALLY EXPRESSIVE MOBILE MESSAGING SYSTEM

Abstract of the Disclosure

5 Methods, apparatuses and systems allowing users to send and receive
character-based, graphically expressive messages using mobile wireless devices. In
one embodiment, the present invention allows users to create and maintain a
customized, easy-to-use visual messaging environment for use with wireless mobile
devices having limited display and other interface capabilities. In one embodiment,
10 the present invention allows users to establish a graphical character-based, messaging
personality, including selectable images of the character that convey a certain mood.
